

Omni will be at ROG.E with drone used in Petrobras contract

The Camcopter S100, the first unmanned aircraft used in offshore cargo Transportation, will be exhibited at the largest Oil & Gas event between September 23 and 26 in Rio de Janeiro.

Rio de Janeiro, September 12, 2024 – Omni Táxi Aéreo, a subsidiary of the Omni Helicopters International (OHI) Group, will exhibit the Camcopter S100 (unmanned aerial Vehicle – UAV), the drone used in a test for Petrobras in the Campos Basin. The event made aviation history as the first offshore cargo transport using an unmanned aircraft in Brazil. The night flight at 8,000 feet covered a distance of 198 km over the sea between the Imbetiba Base, located in Macaé (RJ), and the P-51 offshore platform. The drone will be on display in the event's Instagrammable area.

The Holder of the contract with Petrobras is Omni Táxi Aéreo, and the testing and validation of operational concepts is being carried out jointly with OHI Unmanned and the Norwegian company Nordic Unmanned. OHI Unmanned was launched by the OHI Group to operate UAVs (Classes 1 and 2) of great operational complexity and capacity.

“Attending events like ROG.e 2024 is an excellent opportunity to publicize our work, as well as exchange experiences, learn about market trends and strengthen relationships with clients and partners for future projects”, says Roberto Coimbra, Omni's CEO.

The Camcopter S100 operation aims not only to transport cargo, but also to collect essential data on airspace sharing between UAVs and helicopters. This integration represents a major step forward in the development of unmanned air logistics, resulting in greater efficiency and safety in operations.

In parallel with its logistical use, this UAV system will also add the capacity for effective action in emergencies, such as detecting oil spills and searching for saving human lives in day and night operations.

Organized by the Brazilian Oil and Gas Institute (IBP), the conference, which takes place between September 23 and 26 on Olympic Boulevard in Rio de Janeiro, is expected to welcome more than 70,000 visitors from 65 countries, including industry leaders, authorities, investors, academics and other publics. The event will feature 450 companies from across the energy sector production chain, in eight pavilions, more than 550 exhibitors and seven side events.

ROG.e, formerly known as Rio Oil & Gas, has undergone a rebranding with the aim of reflecting the evolution of the sector, valuing the past and projecting the future on a platform that is both local and global.

About Omni Táxi Aéreo:

OMNI Táxi Aéreo was founded in December 2000 on the pillars of safety, unity, transparency, integrity and creativity. It is a leader in offshore air transportation in Latin America, offering high capacity to serve clients in the Oil & Gas and Energy markets. It offers crew change services, Emergency Medical Services (EMS), Fire Fighting, Search and Rescue operations, as well as specialized Cargo Transport services in remote and challenging locations. Omni Air Taxi is part of the Omni Helicopters International Group (OHI).

About Omni Helicopters International:

Omni Helicopters International (OHI), founded in Portugal in the 90s, stands at the forefront of Latin America's air mobility and delivery solutions sector. As the region's largest provider of these services, OHI caters to diverse customer groups across multiple segments, ensuring seamless and efficient solutions.

Through its subsidiaries Omni Taxi Aéreo in Brazil, Omni Helicopters Guyana Inc., and Omni Helicopters International Mozambique, OHI offers unmatched capability and capacity to serve offshore customers in the fastest growing offshore energy markets. The company's extensive portfolio includes Crew Change,

Emergency Medical Services (EMS), Firefighting, Search and Rescue operations, as well as highly specialized Cargo and Utility services in remote and challenging locations.

In line with its commitment to innovation and sustainability, OHI has two groundbreaking ventures: OHI Unmanned, a specialist division focusing on unmanned aerial vehicles (UAV) services, and Revo, a premium advanced air mobility (AAM) solution provider.
